AN AMAZING STORY

Originally the vision of a pioneer, Erwin Eckl, the resort of Les Saisies continues to develop year after year. Over the past 3 years the resort has invested more than 30 million euro in new public amenities. Dynamic and sporty, with an Olympic reputation in the Nordic field and superb downhill ski slopes linked to the Espace Diamant ski area, Les Saisies is an all round winter sports resort.

The resort's ambassadors?

Renowned athletes, Franck Piccard, triple Olympic medalist in alpine skiing and Raphaël Poirée, 8 times World Biathlon Champion, are proud to personify the values of Les Saisies. In their wake: Clara Direz - winner of the Youth Olympics in 2012, the biathlete Justine Braisaz – silver medalist at the 2015 World Championships in Finland and Emilie Lecomte, regional ambassadrice for the Beaufortain – one of France's top trail runners who will represent the resort at this year's annual Christmas trail race.

Les Saisies, renowned for its vast snow fields and a relaxed way of life, has successfully preserved a traditional spirit and human dimension. A great place for a family holiday!

FROM ERWIN ECKL TO THE BIRTH OF LES SAISIES:

The story of Les Saisies dates back to 1935 when Erwin Eckl, an Austrian ski instructor, discovered the area by happenstance. His visionary spirit and pioneer attitude enabled him to foresee the potential here. A year later he built the first hotel in the middle of snow-covered fields, at the foot of Mont Bisanne. Equipped with a kitchen, 5 bedrooms and a dormitory for up to 30 people, he installed water and electricity and transported supplies by foot or by dog sled. A pioneer of winter sports, he took his clients ski touring to the summits of Bisanne, Char du Beurre and La Legette.

In 1946, under his leadership, the first drag lift was installed on the mountain pass next to his hotel. Extremely successful, it guaranteed the development of his family-run business. In 1963, Les Saisies purchased Erwin Eckl's drag lift (the mythical Bisanne drag). This marked the birth of the ski resort and the start of development.

DATES TO REMEMBER :

- 1935 # Erwin Eckl discovered the area by accident and decided to settle here.
- 1936 # Erwin Eckl built the first hotel on the mountain pass
- 1946 # Date of the first drag lift: a resort is born in the middle of the alpine pastures
- 1963 # The Bisanne drag lift contributes to the success of the resort. The only ski lift open in the area (lack of snow elsewhere)
- 1988 # Frank Piccard became Super G Champion at the winter Olympics in Calgary
- 1992 # Les Saisies hosted the Nordic skiing events at the Albertville winter Olympics
- 2005 # 2005 Creation of the "Espace Diamant" ski area
- 2013/14 # Les Saisies celebrates 50 years
- 2014/15 # Les Saisies invests more than 25 million euro in new amenities

ON SLOPE IN LES SAISIES!

Imagine a vast area nestled at the foot of Mont-Blanc, between the Beaufortain and Aravis. Located between 1000 and 2000 metres altitude, the 'Espace Diamant' boasts exceptional snow conditions for every style of skiing. A winter wonderland, it combines the charm of its 6 ski-in ski out village resorts and the drive and innovation of its ski areas. The last of the French ski domains to have been inter-linked, the 'Espace Diamant' covers Hauteluce - Les Saisies, Crest-Voland-Cohnoz, Flumet, Notre Dame de Bellecombe and Praz sur Arly.

L'ESPACE DIAMANT, FACTS & FIGURES

- 192 kms of slopes
- 151 slopes
- Gentle skiing (31 green slopes and 59 blues), or more sporty skiing (47 red slopes and 11 blacks)
- 85 ski lifts
- 40 % of the ski area is equipped with artificial snow-making facilities

SNOWBOUND

According to the French Met office, since 1982, the average snowfall in the Beaufortain and Val d'Arly regions is greater than on all the surrounding mountain ranges.

This winter the ski area opens in early December, on the weekends of 3rd/ 4th and 10th/ 11th (depending on snow conditions) before opening permanently from 17th December 2016 to 21st April 2017.

NEW | 6 MAN CHAIR LIFT ON BISANNE: LES SAISIES TURNS THE PAGE!

50 years after the commissioning of the first drag lift in resort, the famous Bisanne drag has been replaced by an ultramodern 6 man chair lift with a magic carpet on departure and overnight seat storage facilities (clean and dry the next day). Passenger flow has been increased from 2400 to 3300 people per hour whilst the number of pylons has been reduced from 21 to 16.

MARIANNE BAL: THE LADY GROOMER

Marianne Bal refuses to be intimidated by men and has been driving a snow grooming machine for the past ten years now!

She started on the downhill ski slopes before moving onto Nordic grooming, more tricky and precise (being a woman can be considered an asset)! 120 km of slopes to groom, a communion with nature for Marianne. Born to drive, she also handles concrete mixers in the summer season!

NORDIC ADVENTURES

ENJOY A UNIQUE EXPERIENCE AND LIVE THE LIFE OF A ROCKY MOUNTAIN TRAPPER

Following the success of last winter, the Amerindian trappers are back in Les Saisies. Tents, camp fires, hunting tools, charms, goods and furs...the reconstitution is amazing! Period costume, traditional meals, finger weaving, woodworking and the picture is complete!

This winter, 4000 holidaymakers are expected to share the experience. Visits include pancake tasting, cooked on the camp fire.

Visitors are welcome daily from 11:00 to 17:00 from 12th to 25th February 2017 (dates to be confirmed). Free of charge.

LES SAISIES & NATURE

NEW | LES SAISIES, WINNERS OF THE ECO-FRIENDLY SNOW GROOMING CHALLENGE 2016

The aim? To optimize the production of artificial snow, to make the right amount of snow and therefore avoid wasting energy and water.

Michel Frison-Roche, the Director of the management company hopes to prove within four years, that it is profitable to invest in a snow-grooming optimization programme resulting in a significant positive impact on the environment.

The resort was rewarded for its project to merge two computer interfaces, artificial snow production and snow-grooming. The management company in Les Saisies advocates better communication between these two very different services, one working throughout the day, the other throughout the night.

NEW | SNOW FOR THE TOUR DE FRANCE!

Unbelievable: Franck Piccard skiing on real snow during the passage of the Tour de France in Les Saisies on 22nd July 2016! Proof that the resort challenge is underway to ensure optimal snow conditions through a new unique snow storage process.

For the 2018 season, an 800 to 1000 m circuit will be created in the biathlon area using a method based on a mix of sawdust. The snow remaining at the end of the season, together with a certain amount of artificial snow on site, will be covered in sawdust to protect it from the outdoor elements and insulate it from the air and the sun.

30 NEW SNOWMAKERS

This winter the resort improves its artificial snowmaking network by adding 30 new snowmakers to the ski area. Particular attention is being paid to the "Chevreuils" slope, due to benefit from 20 new snowmakers.

These new technology snowmakers contribute to the control and limitation of the resort's energy consumption and carbon footprint.

UNIQUE | ENVIRONMENTAL OBSERVATORY

The ski lift management company in Les Saisies is in the process of setting up an environmental observatory across the ski area in the aim to obtain deeper environmental knowledge and anticipate future development. The goal is to minimize the environmental impact and preserve the richness and fragility of the alpine surroundings. Surveys on fauna, flora, water, landscape, interaction with agricultural activities and summer activities are being carried out. Different areas of moderate to high environmental concern will be defined for future reference.

After several years commitment to sustainable development, Les Saisies officially obtained the ISO 14001 certification in February 2012, attesting the conformity of its policies and activities to the recent standards established by the International Organization for Standardization. A real achievement for the resort that actively campaigns in favour of the environment.

ECO-FRIENDLY ACTIONS:

- Optimization of the snowmaking network in an aim to reduce air consumption and therefore electricity. Additive free artificial snow.
- Snow grooming machines equipped with satellite guidance systems: 8% less time spent on piste = less fuel consumption. Training of the team in eco-friendly driving techniques.
- Tenders for development work integrate a number of criteria for sustainable development.
- Regular clean-up campaigns in collaboration with the neighbouring town of Ugine in an aim to make youngsters more aware.
- Dry toilets and waste rubbish bins on the ski area.
- Awareness campaigns for all staff (permanent and seasonal) to encourage an eco-friendly attitude.
- Returfing and completion of works on the access to the Nordic ski area.
- Sale of pocket ashtrays.

NATURE-FRIENDLY ACTIONS:

- Carbon Assessment
- A fuel replacement programme for snow grooming machines. New less polluting diesel fuel is now used. The water used to wash snow grooming machines and other vehicles is also collected.
- Re-turfing of the ski slopes in summer.
- Electricity cables are being progressively buried.
- Protection of wild birds such as Tetra Lyre (certain areas are forbidden to skiers).
- Marking of cables on some ski lifts to limit bird collision.
- An environmental protection order (Natura 2000) concerning the peat bogs in the Nordic area.
- The garage of a residence for seasonal staff now houses the 6 shuttle buses in the aim to reduce the carbon impact of repeat journeys from Albertville to Les Saisies.

LE SIGNAL, POOL COMPLEX & LEISURE CENTRE

READY, STEADY, DIVE !

Its unique architecture and glass frontage offer maximum sunlight and breathtaking 360° views of the surrounding mountains. Suitable for the whole family, for athletes or business purposes.

The **pool complex** is equipped with two counter-current swim lanes, a large fun pool with jets, a river and bubble benches and an area dedicated to small children.

The **wellness area** is equipped with a sauna, a steam bath and several jacuzzis - including one deeper jacuzzi that relaxes, tones and improves circulation in a standing position.

Hanakasumi treatment care - A Japanese inspired protocol combining a glove scrub and a relaxing and nourishing body and foot modeling massage ritual.

Oriental ceremony - A relaxing oriental inspired ritual consisting of warm spice scented parcels, a spice scrub and a nourishing modelling massage.

A multi-sports centre

The **multi-sports area** houses badminton, volleyball, squash and basketball courts. The hall is also equipped with a climbing wall. Tournaments, fitness sessions, pilates, circuit training, aqua bike and aquagym sessions are proposed on a daily basis.

High level physical training for top level athletes

The **gym complex** proposes comprehensive exercise programmes to ensure optimal use of the equipment.

A HYPOXIC CHAMBER UNIQUE IN FRANCE

The new leisure centre houses a hypoxic chamber, unique in France. According to INSEP - a hypoxic chamber artificially recreates the conditions at altitude. For a top-level athlete, simulated altitude helps to stimulate hematologic, respiratory and metabolic adaptations designed to increase ones level of performance. According to INSEP, a course in a hypoxic chamber improves performance for up to three weeks.

The GMHM (high mountain military group), Chambéry Savoie Handball, Guillaume Bonnafond (professional cyclist), Nicolas Roux (cyclo Ambassador for Les Saisies) and Tahar Manai (the first Tunisian mountaineer to climb Everest), use this chamber for physical training purposes.

Gym, fitness : €14.50

Modelling massage : from €53

EVENING OPENING AT LE SIGNAL:

In the evenings, Le Signal pool complex takes on a whole new dimension: intimate lighting creates a more relaxing atmosphere intensified by the breathtaking views of night fall on the surrounding mountains.

CHARMING CHALETS

THE CHALET NANTAILLY: A DESIGN ECO-LODGE

A charming address, this ancient farmhouse - dating back to 1781 - was entirely renovated in 2015. Now a spacious 250m² Eco-lodge, inspired by nature and design, it accommodates up to 15 people.

Old furniture has been given a second life. The original wood from the chalet has been used to create lamps or headboards and the old wooden roof tiles now cover the chalet walls.

Here nature and furniture become one. The care taken in the choice of decorative objects make every room unique, each hiding several mysterious sensory experiences.

Each of the 6 rooms has its own identity: "Les Alpages" (breathe in aromatic plants of the Alps); 'Les Sommets' - (place and replace the magnets on the map to mark those peaks climbed or those that you dream of climbing), "La Ferme", « l'Air Libre », « la Neige » and « la Pente ».

This luxurious retreat boasts two lounge/games areas, a central wood stove, a dining area and kitchen. Terraces with panoramic views and an eco-friendly Nordic hot tub are an invitation to relax outdoors. Guests have the use of a ski room and covered parking in the event of heavy snow! 'Eco-lodge' approved by Gîtes de France, Chalet Nantailly displays the green attitude of the owner and eco-design advisor, Fabienne Le Hénaff.
